# Cybersecurity Consulting

An Overview of HaystackID's Cybersecurity Consulting Practice

HAYSTACK®

Cybersecurity Consulting from HaystackID®

Proven Expertise and Practical Services

Cybersecurity and the practice of ensuring data integrity, confidentiality, and availability spans the spectrum of the information lifecycle from the creation of data at the start of the data discovery lifecycle to the defensible disposition of data at the end of the legal discovery lifecycle. To address the expanding needs of legal, information technology, and security professionals operating in the eDiscovery ecosystem, HaystackID has created a dedicated consulting practice and an initial set of services designed to address cybersecurity challenges unique to audit, investigation, and litigation efforts. These cybersecurity services are focused on three core functional areas and help customers accomplish three core tasks.

Core Cybersecurity Functional Areas

- Cyber Risk (Vulnerabilities, Exposure, and Testing)
- Information Governance (Compliance, Privacy, and Protection)
- Managed Security (Intelligence, Migration, and Remote)

Core Cybersecurity Tasks

- Assessment (Audit, Evaluate, and Recommend)
- Implementation (Scope, Test, and Deploy)
- Management (Support, Report, and Remediate)

From cybersecurity incident response planning to ReviewRight® Protect™ consulting, these services can be employed in data discovery and legal discovery situations from the point of unstructured data creation and interrogation throughout the information (and litigation) lifecycle.

Additionally, with the complete eDiscovery portfolio of Forensics First, Early Case Insight, and ReviewRight offerings available from HaystackID, the Cybersecurity Consulting Practice is fully capable of translating assessments and advice into implementation and management for organizations anticipating or engaged in audits, investigations, or litigation.

Learn More. Today.

About HaystackID®

HaystackID is a specialized eDiscovery services firm that helps corporations and law firms securely find, understand, and learn from data when facing complex, data-intensive investigations and litigation. HaystackID mobilizes industry-leading cyber discovery services, enterprise solutions, and legal discovery offerings to serve more than 500 of the world's leading corporations and law firms in North America and Europe. Serving nearly half of the Fortune 100, HaystackID is an alternative cyber and legal services provider that combines expertise and technical excellence with a culture of white-glove customer service. In addition to consistently being ranked by Chambers USA, the company was recently named a worldwide leader in eDiscovery services by IDC MarketScape and a representative vendor in the 2021 Gartner Market Guide for E-Discovery Solutions. Further, HaystackID has achieved SOC 2 Type II attestation in the five trust service areas of security, availability, processing integrity, confidentiality, and privacy. For more information about its suite of services, including programs and solutions for unique legal enterprise needs, go to HaystackID.com.
