Secure Remote Review 3.0 Security Enhancements
from HaystackID[®]

HAYSTACK[®]

Security with Remote Review

HaystackID offers a range of specialized document review services, collectively called ReviewRight®, to meet the eDiscovery needs of law firms and legal departments for complex, data-intensive reviews. The services offered include secure remote review, reviewer qualification and sourcing, data breach discovery and review, foreign language review, managed review, review hosting, and technology-enhanced review.

ReviewRight Virtual offers the core of HaystackID's remote review capability, enabled by secure remote review security enhancements. These security enhancements provide a layered approach to review security, consisting of a review terminal security layer, a review platform security layer, a review session security layer, and a review support security layer. These features are available to ensure the appropriate level of security for specific policy, privacy, and project needs.

ReviewRight®

ReviewRight is a specialized set of document review services from HaystackID designed to help law firms and legal departments quickly and accurately learn from their data to make the right decisions for positive and quality investigation and litigation outcomes. These specialized services address essential eDiscovery needs for complex, data-intensive reviews.

Secure Remote Review 3.0 Security Enhancements

Within this offering portfolio, the core of HaystackID's remote review capability is enabled by the ReviewRight Virtual offering and its secure remote review security enhancements. These security enhancements, many available in basic form since the inception of our remote review services, represent the most advanced review-centric features in the data and legal review market and are the practical representation of HaystackID's experience with over 3,500 remote review matters during the last eleven years. Leveraging the latest in third-generation secure remote review security enhancements (Secure Remote Review 3.0), HaystackID's remote review security capability ensures you can connect, communicate, and comply with the most stringent of legal and regulatory security and privacy requirements.

Four Layers of Remote Review Security

HaystackID's Secure Remote Review 3.0 enhancements provide a layered approach to review security, ensuring you have access to the most appropriate set of features for your remote review requirements. These security layers include:

- Review Terminal Security Layer: Connectivity and Collaboration-Centric Features
- Review Platform Security Layer: Review Platform-Centric Features
- Review Session Security Layer: Advanced Review Session-Centric Features
- Review Support Security Layer: Review and Review Team Support Features

Developed, designed, and integrated into HaystackID's ReviewRight Virtual offering to allow for the selection and use of any and all of the four security layers to ensure the appropriate level of security for your specific policy, privacy, and project needs.
