Powerful enough to be used individually and unmatched in capability when integrated, learn more about HaystackID's ReviewRight services and why they are viewed as the **first choice and best choice** for document review services by the world's leading corporations and law firms at HaystackID.com.

ReviewRight Virtual

In today's fast-paced review environments, review teams need the flexibility to securely operate as part of virtual teams from anywhere at any time. ReviewRight Virtual provides that capability through the delivery of scalable fully managed virtual desktop environments for reviewers. This capability includes quick spin-up, virtualization software, patching and updates, security, bandwidth, and reporting and monitoring all for a predictable monthly operating cost.

ReviewRight Virtual End User Access

ReviewRight Virtual takes a comprehensive approach to security and controls to specifically address each layer of the cloud-delivered desktop. From the user and his/her endpoint devices, all the way to the physical data center infrastructure security has been built into the offering using a combination of virtual technologies, hardware and customizable user controls.

ReviewRight Virtual also offers PCI and HIPAA HITECH compliant desktop environments, helping regulated organizations more easily achieve and maintain compliance.

This ReviewRight Virtual end-user access coupled with HaystackID's privacy and security approach from policy to data center infrastructure, extends critical and necessary privacy and security controls all the way to the reviewers fingertips, regardless of location.

ReviewRight Virtual User Controls

ReviewRight Virtual cloud-delivered desktops enable organizations to restrict access and capabilities using more than 100 available control attributes. Controls can be customized per user, according to groups using Group Policy Objects and other methods. Commonly implemented controls include:

✓ **Restrict User Administrative Rights**	✓ **Deny Printing (Local, Network, Screen)**	✓ **File and Folder Redirection**
✓ **Disable USB Access to Peripheral Devices**	✓ **Clipboard Redirection**	✓ **Turn off Copy and Paste Completely**

ReviewRight Virtual Benefits

ReviewRight Virtual provides organizations key benefits that can enhance the effectiveness and efficiency of reviews while ensuring required security. These benefits include:

Key Benefits

Secure the Endpoint

Protect against device theft or loss and control where data resides by getting it off the endpoint.

Protect Sensitive or Proprietary Data

Control or restrict specific behaviors to ensure users can access only what they need.

Seamless Integration with Existing App Infrastructure

No need for duplicate authentication systems or to require users to manage multiple logins and passwords.

Eliminate Network Vulnerabilities

Highly redundant, highly available balancers, front-side/back-side network isolation, VLAN and IP address, isolation and customer-specific security configurations.

Reduce Device & OS Maintenance

Hardened OS results in greater security and control while enterprise-grade anti-malware, rigorous patching and updates, and golden image management ease traditional IT burdens.

With a combined security and privacy capability that addresses requirements at the user level, endpoint device, endpoint session, OS and application, network, and physical security levels, HaystackID's review capabilities coupled with ReviewRight Virtual give organizations the flexibility they need without any sacrifice of security.

About HaystackID

HaystackID is a specialized eDiscovery services firm that helps corporations and law firms find, listen, and learn from data when they face complex, data-intensive investigations and litigation. With an earned reputation for mobilizing industry-leading computer forensics, eDiscovery, and attorney document review experts, HaystackID's Forensics First, Early Case Insight, and ReviewRight services accelerate and deliver quality outcomes at a fair and predictable price.

Find Data with Forensics First℠ Services	Listen to Data with Early Case Insight℠ Services	Learn from Data with ReviewRight® Services
